

VOLVO

TWO ACTIVE RELATIONS IN SHIPIT

If you notice two unloading points that are exactly the same (while creating a manual booking), please note the **valid from / to dates** under each unloading point:

Service level: STD_INB
valid from - to: 18/09/2024 - 00000000 !

VOLVO

This will either block or unblock the calendar (hidden behind the drop down list), as the first relation will not be possible to use **after 17/09**.

The second relation is the one that should be used for every booking **from 18/09 onwards**.

NOTE: In below example, the older relation (the first one on the list) will disappear from the list after that **Valid To** date (will not be visible for users on 18/09).

NOTE2: Please remember that templates with these gates will be affected. **New template with updated info is required.**

The image displays two calendar views for September 2024. The left calendar shows dates 26-30 and 17 highlighted in red. The right calendar shows dates 18-20, 23-24, and 30-1 highlighted in cyan. A pop-up window shows two '095' relations with valid dates. Red arrows point from the pop-up to the highlighted dates in the calendars.
